

Collaboration, support and data value creation in data spaces

Madrid, 3rd December 2024
Ana García Robles (Secretary General, BDVA)

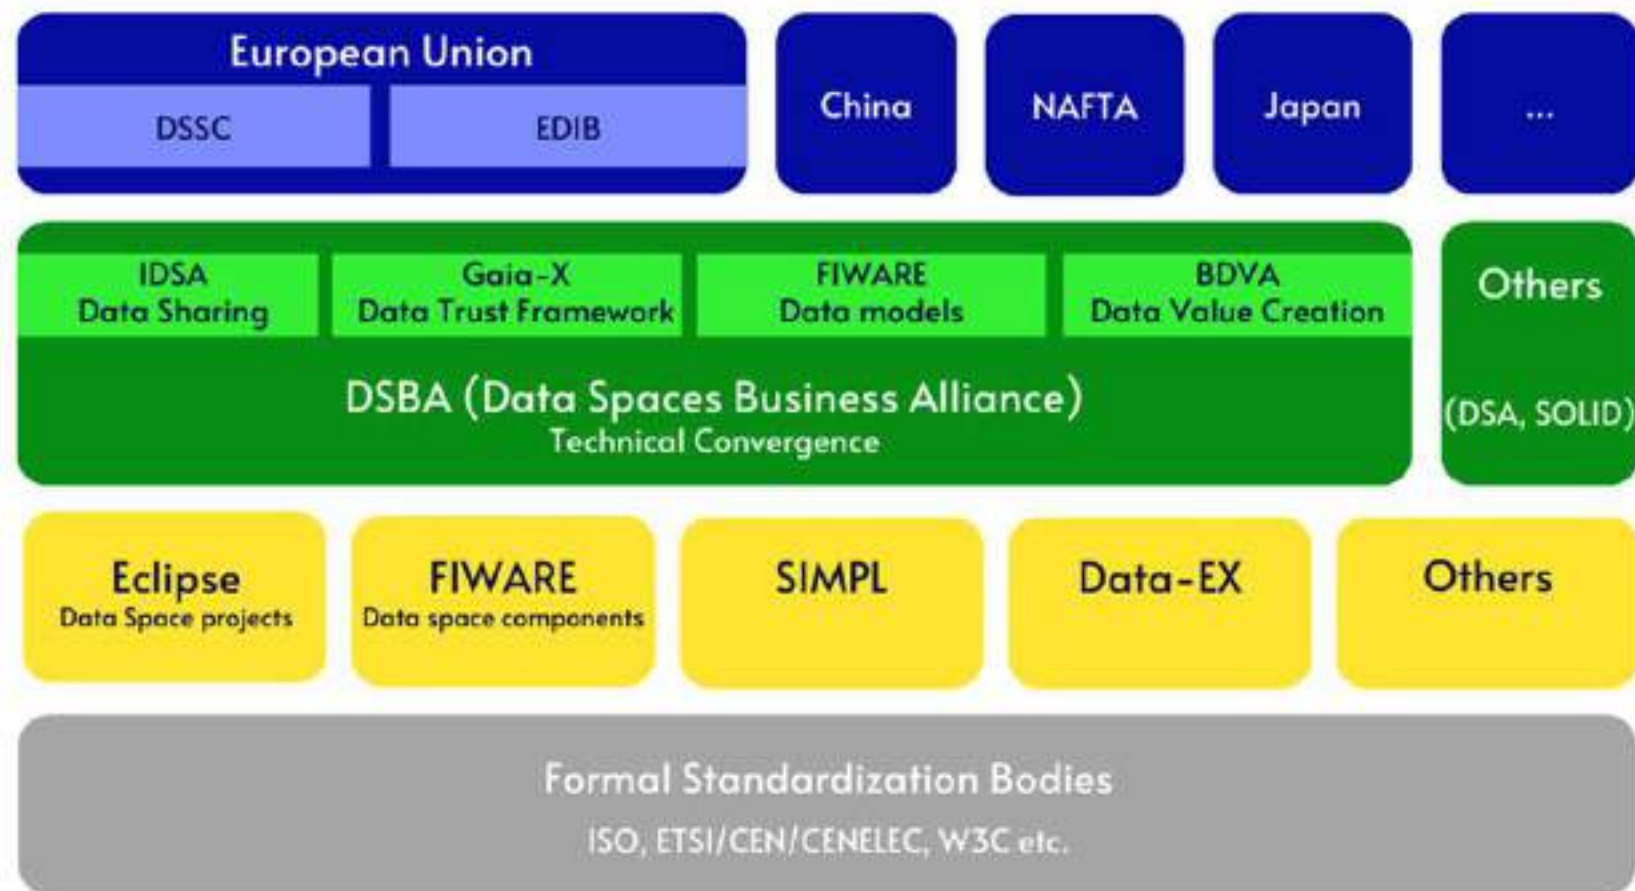

Data Spaces Business Alliance

Unleashing the Data Economy

Regulatory, business and technical foundation for Data Spaces within the Edge-Cloud-Continuum

Data regulations in economic regions

Data strategies implementation

User requirements, Voice of the communities, coordinate technical specs and business requirements, support to "business design"

Alignment in technical specifications and standards to adopt

Technical implementation driven by OSS, place for the developer communities

Long-term investment security, adoption support etc. through norms and standards

Data Spaces Support Centre Overview

The Data Spaces Support Center receives funding from the European Union Digital Europe Programme under grant agreement n° 101083412.

The DSSC and its mission

Partners

Associated and collaboration partners

Recently delivered !

Blueprint v1.5:

- Updates in the Data Space Building Blocks, Co-creation Method, Glossary & Conceptual Model.

Toolbox v1.0:

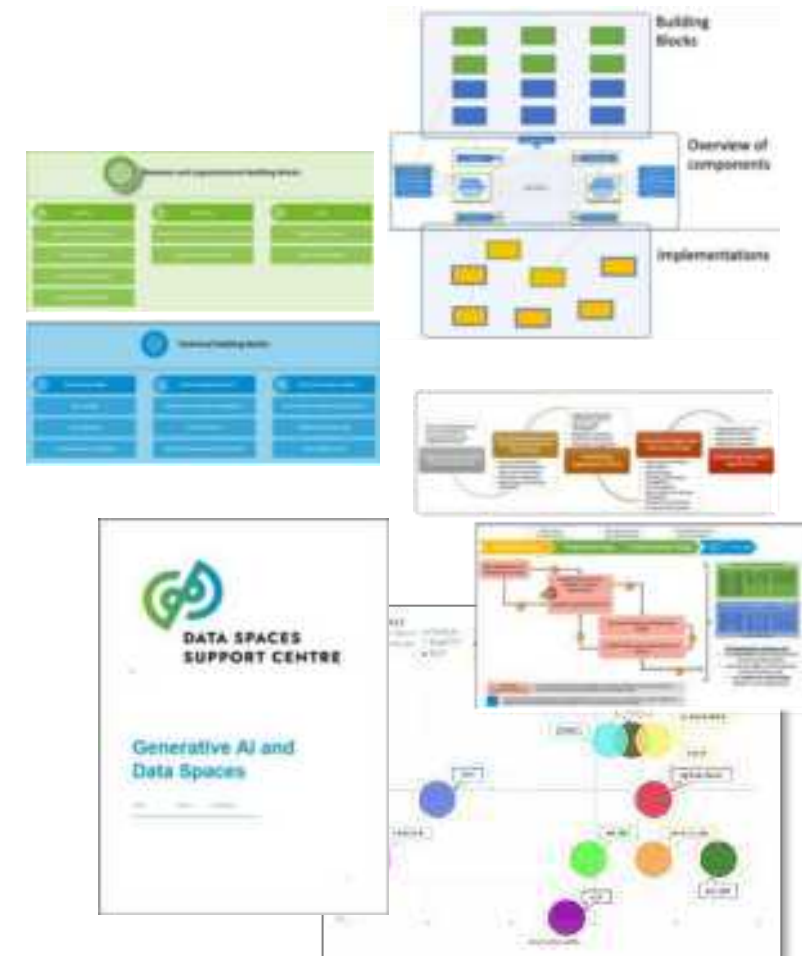

- A curated catalogue of data space solutions (tools), like connectors/ participant agents and federated services and more components you need to set up, participate in and operate a data space.

Data Space Design:

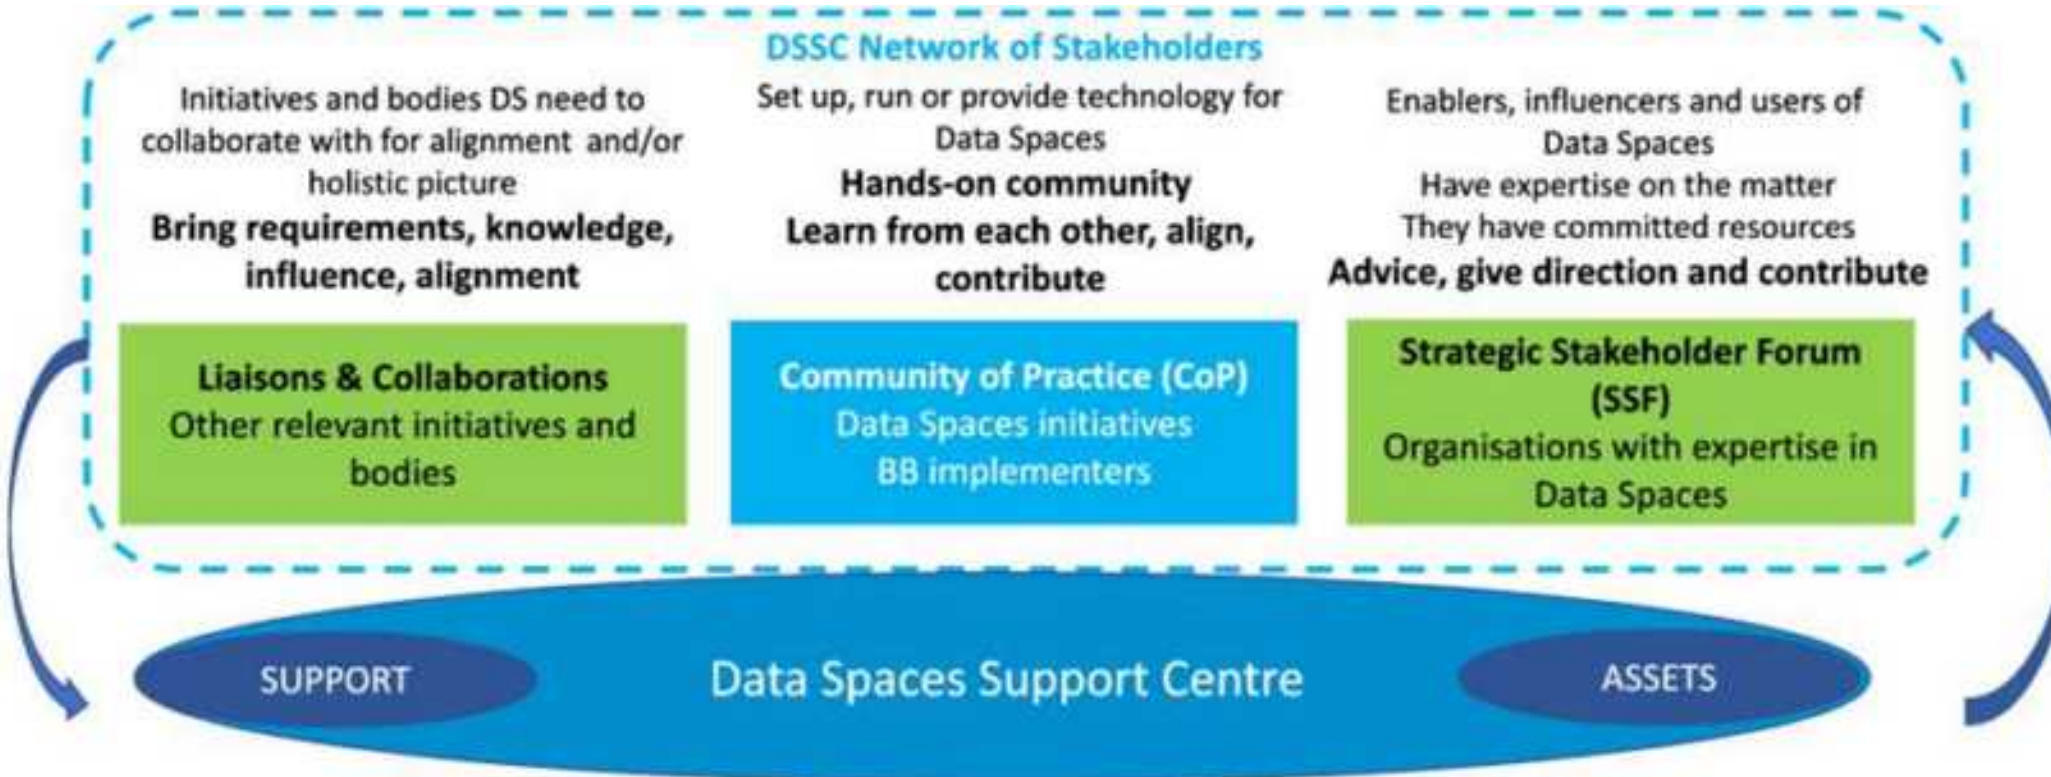

- Updated version of the Starter Kit, Design Principles paper and Synergies paper.

Several resources delivered with our network of Stakeholders

- "Generative AI and Data Spaces" White Paper.

The Network of Stakeholders (NoS)

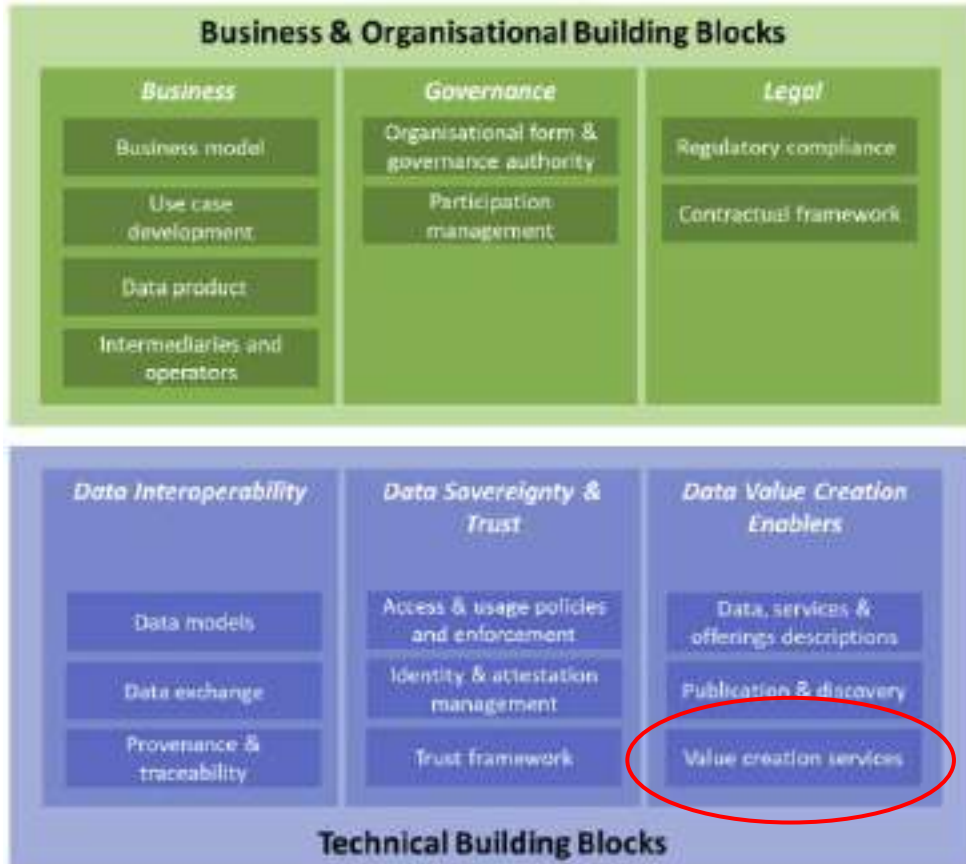

- **Composition:**

- **17 fully engaged Initiatives in the Community of Practice** (preparatory & deployment actions funded by DEP, HE),
- **32 members in the Strategic Stakeholder Forum** from 12 EU countries (DGs, RTOs, member state public Authorities),
- **+90 engaged initiatives in Liaisons & Collaborations** (EDIB, SDOs, R&I projects, EU data initiatives, AI, Cloud-to-Edge, ...).

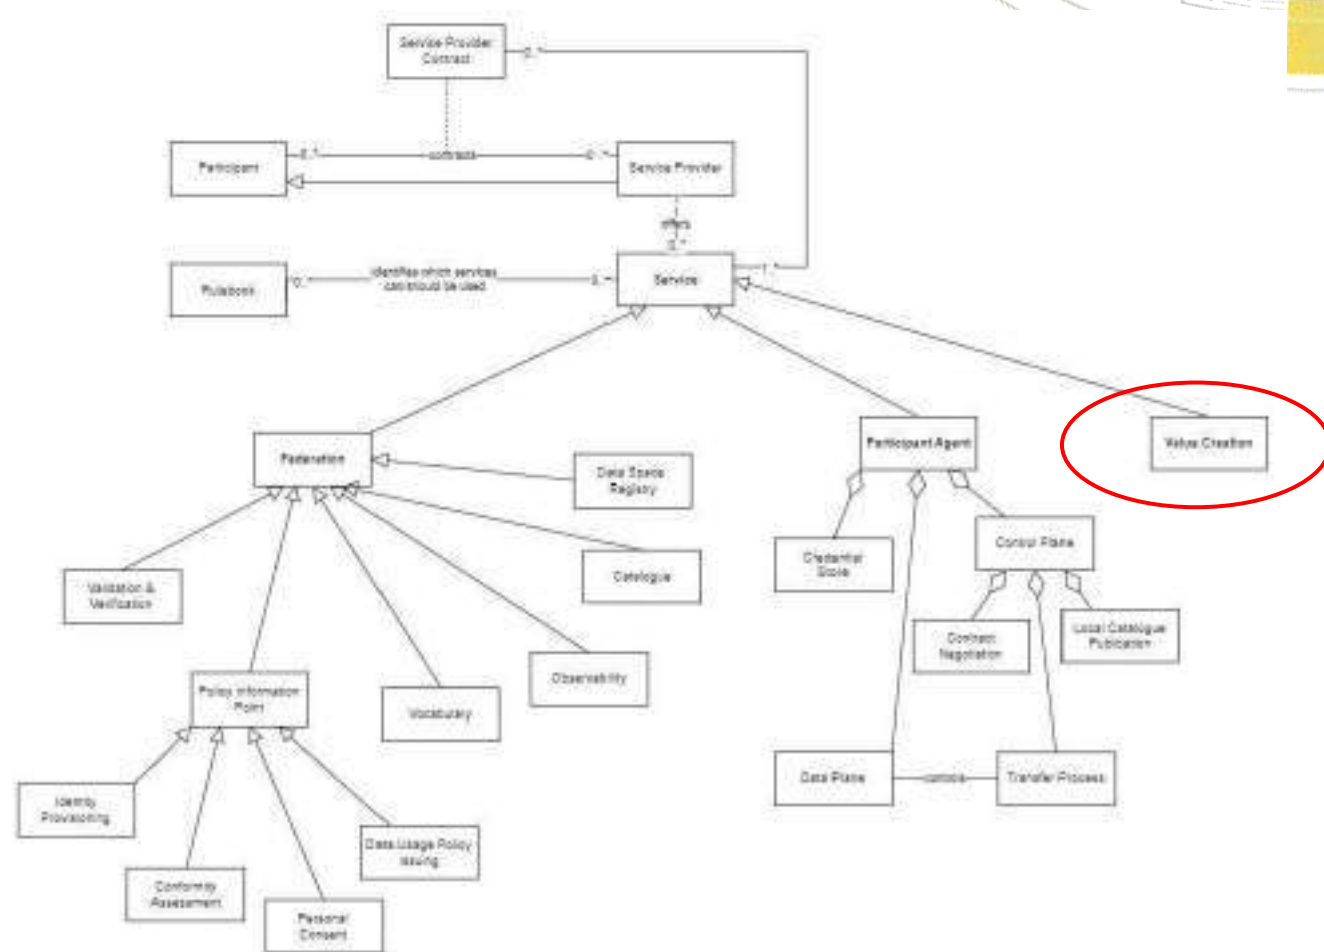

The Data Spaces Support Center receives funding from the European Union Digital Europe Programme under grant agreement n° 101083412.

Value creation services

BDV BIG DATA VALUE
ASSOCIATION

Overview to BDVA objectives and outcomes

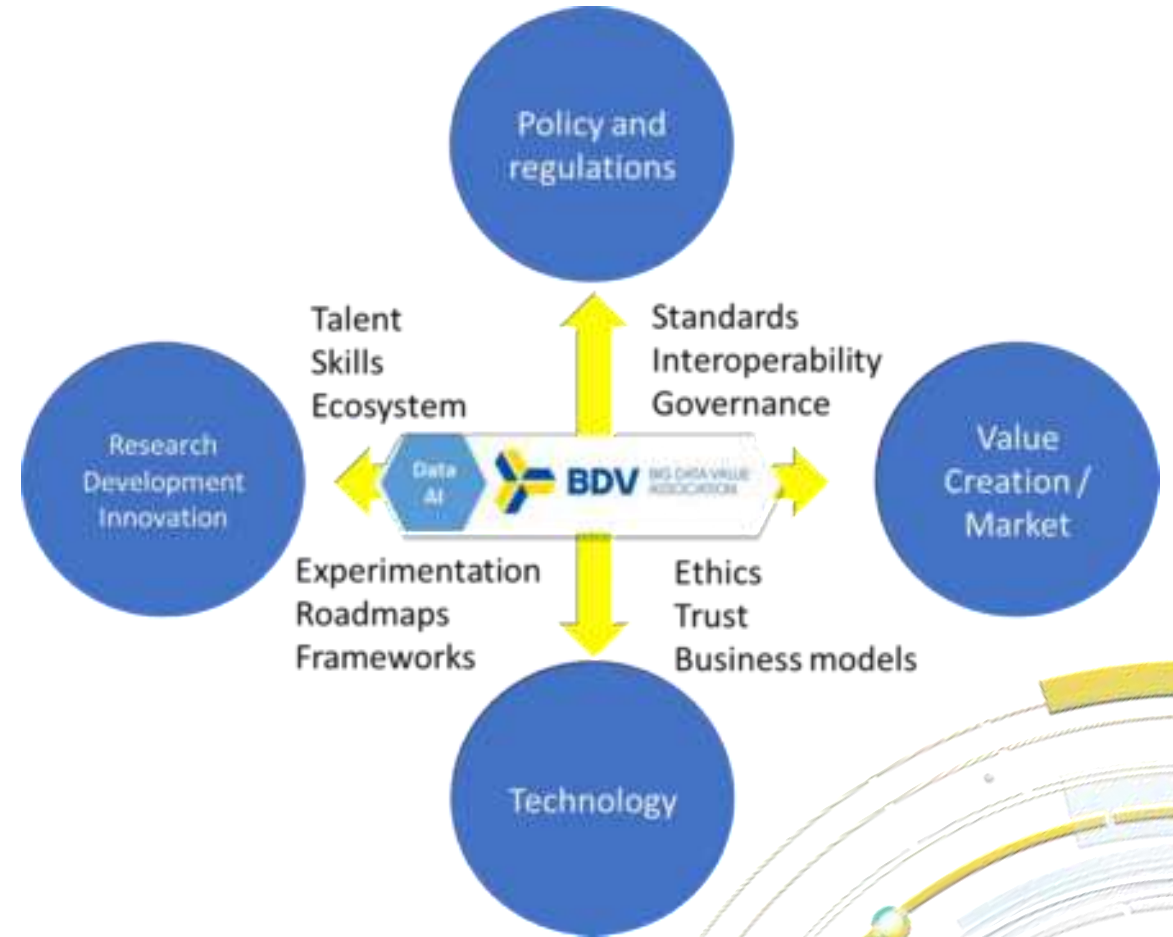

Overall objectives

To boost Data and AI innovation and data value creation for business, citizens and the environment

To foster excellence in Data and AI research for competitiveness

To develop the innovation ecosystem that enables and accelerates Data and AI economy with European values and focus but global impact and ambitions

To lead and be at the forefront of the dynamic change that Data and AI brings to business, public sector and society

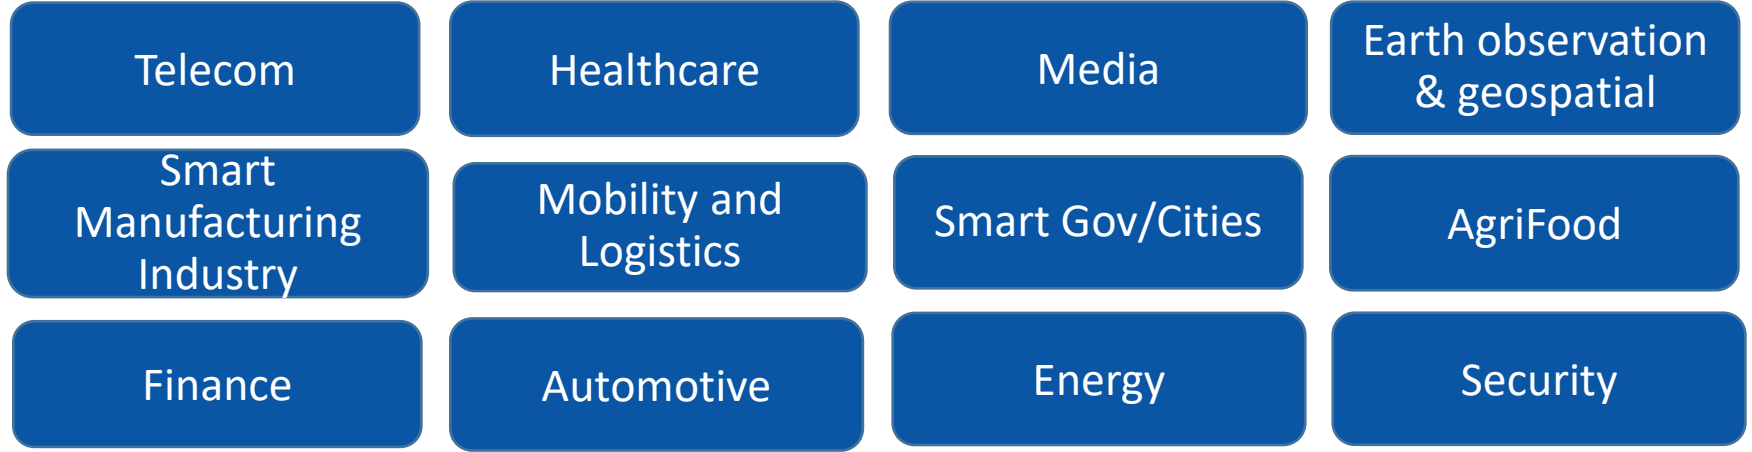

International non-profit association:

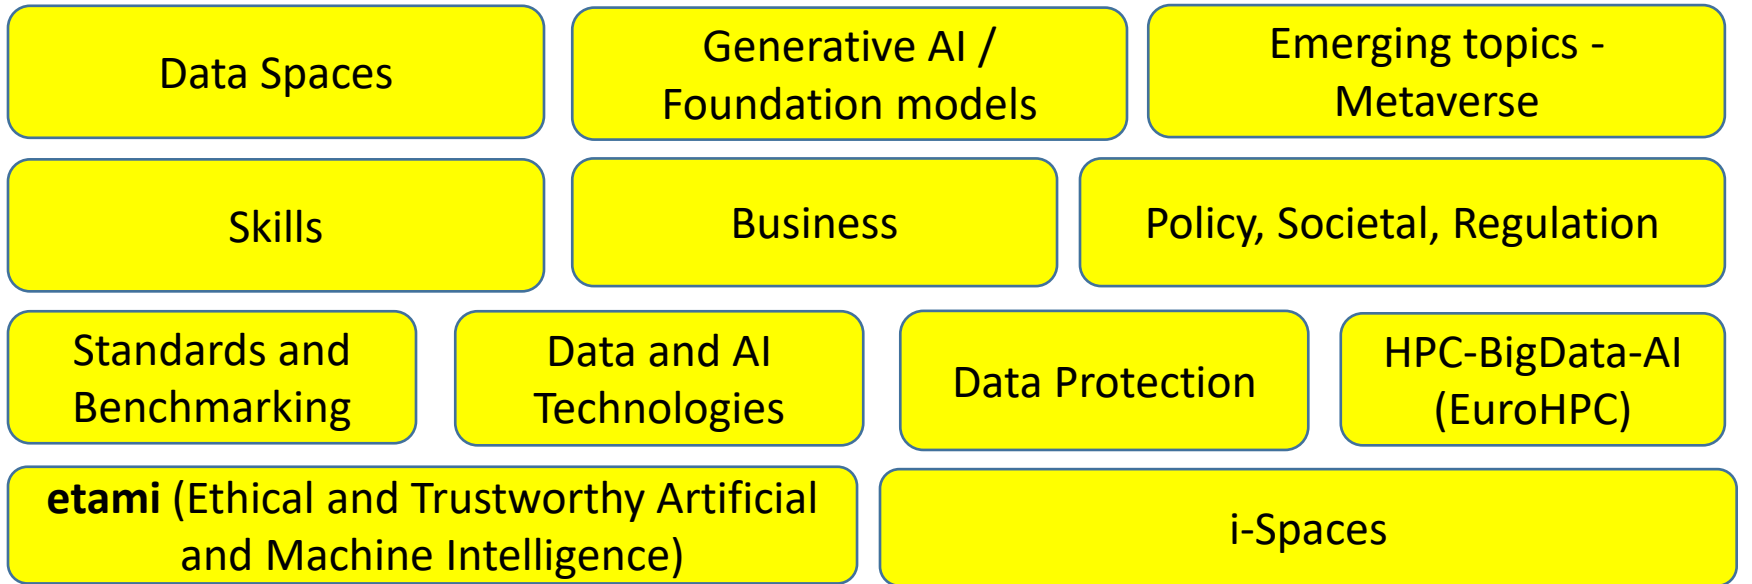

Industry-driven research and innovation Data/AI community with over 250 members all over Europe.

BDVA Task Forces structure

Sectoral Task Forces

Cross-sector Task Forces

Foundational Task Forces

BDVA Strategic Agenda to guide industrial sectors

<https://bdva.eu/docs/bdva-strategic-agenda-2024/>

Activities led by Task Forces

Empowering European industries and societies for a human-centric digital future

- Promote the adoption of Generative AI across sectors, including the public sector and citizens (addressing personal data concerns),
- Exploring virtual worlds in federated digital ecosystems
- Other emerging topics (e.g Quantum-AI)

Expanding data-driven ecosystems across sectors and (global) value chains

- Enhance the data value creation framework
- Data sharing for generative AI,
- Interoperability and Synergies framework, including semantic interoperability.

Making Data and AI innovations fit for emerging infrastructures and platforms

- Collaboration with the AI factories (as private member of the EuroHPC JU)
- Big Data and AI over the computing continuum

Sustainable data and AI

- Promotion of sustainable data and AI and data and AI for sustainability

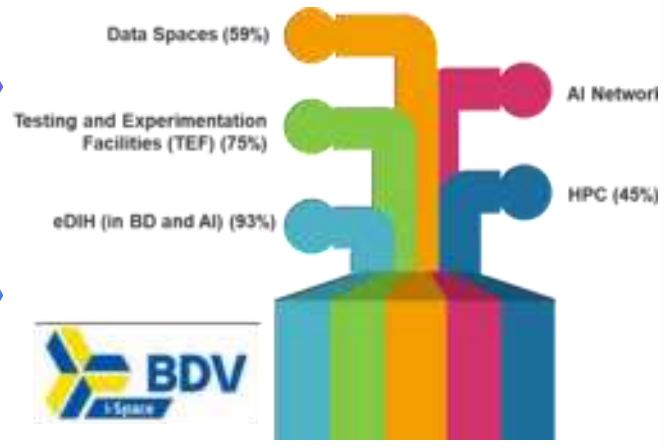

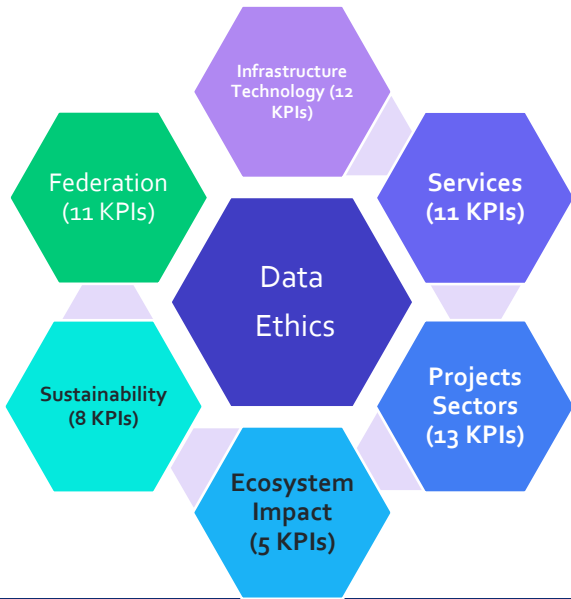

Integrating innovation, ethics and compliance

- Advance ethical AI and tools for AI Act implementation (etami),
- Data and AI for compliance
- network of national experts on regulatory sandboxes,
- i-Spaces Federation to drive innovation, experimentation, and adoption in Data and AI.
