Business Innovation & Data Ecosystems

Data Platforms & IT Infrastructures

Data Spaces

Technology Providers

Certification & Standards

# MEDIA INDUSTRY CONTEXT

Rise of **AI technologies** and the speed of adoption of AI tools  
→ urgent need for **better data management and control**.

Media organizations urgently need **to cooperate to develop and adopt data-driven processes** and solutions that will enable them to be more competitive.

**Can a shared data space revitalize the European media industry and create new opportunities?**

TEMS can be viewed as an ecosystem where entities from the sector, such as **TVs, press and news agencies, producers, publishers, distributors of audiovisual content, podcasters**, etc., generate new business models based on the data sharing.

# OBJECTIVES

Provide the necessary technical infrastructure ,governance and sovereignty mechanisms for secure and reliable data exchange.

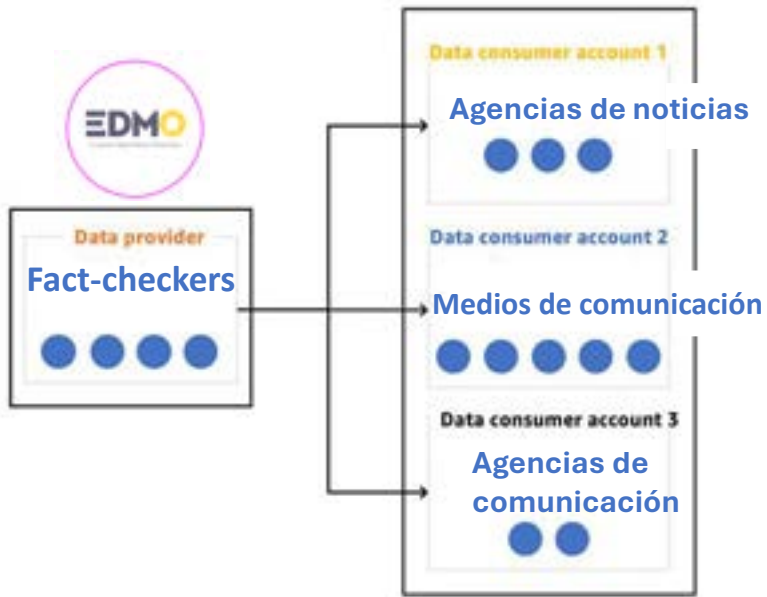

Building the data space **around 8 specific use cases** in which data will be shared and exploited to meet specific business needs in the media sector.

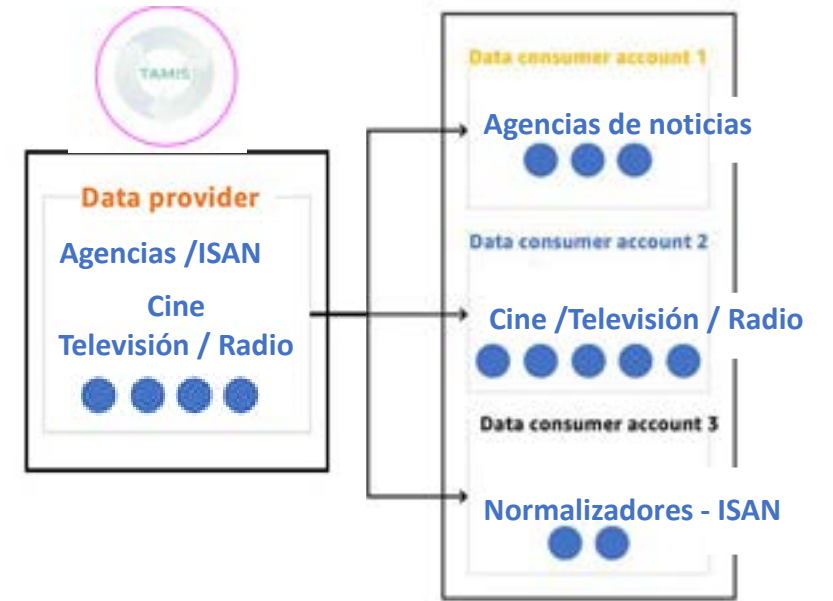

- **Fact-checking**
- **Audience Data**
- **Content Personalization**
- **Audiovisual Production**
- **New Formats with AI+XR**

# NEWS AND FACT-CHECKING
